# Tech Stack

# Appendix

Additional information slides

# Solution Proposal

- Return to the office may increase stress
  - ◆ Our tool enables a true hybrid work setup
  - ◆ No trade-off is necessary
- Lack of trust & transparency
  - ◆ Seamlessly integrate personal constraints
  - ◆ Clear communication for support of personal matters
- Mental health not priority
  - ◆ Flexibility in time management alleviates mental stress
  - ◆ Flexible timeplanner for reducing extra hours
  - ◆ Prevent burnouts through maximizing individual flexibility
- One solution doesn't fit all
  - ◆ Focus on individual needs and preferences

# Features

# Feature Roadmap

- Predictive analytics for burnout prevention
- optimizing office usage
- definition of milestones and deadlines
- third-party app integration (Calendly, etc.)

# Benefits

- Flexibility and Trust
- Skip commutes
- Improve work-life balance
- Increased workplace safety and flexibility of work could help reduce employees stress
- Implicit support for reconciliation of private and work life is built into the app
- Schedules are strongly dependent on employees preferences
- We encourage taking time to properly plan the future in order to avoid any conflicts and forgetting tasks

# Materials

# MVP

Front-End: Calendar with schedule that gets displayed when tasks and working mode (remote/on-site) preferences are selected.

Back-End: Randomly creates unskippable meetings with either location (remote/on-site) and jams calendar. Scheduler that allocates the rest of the elements according to preference scores. Breaks and free-time slots will improve score of overall schedule. Private anonymous time slots may be allocated if there is availability.
